Bakery markdown and waste controls

Sunrise Pantry

Sunrise Pantry is a fictional Zarqa supermarket with an in-store bakery. These controls apply to wholemeal bread on 15 October 2026. Prices and costs are JOD per loaf. The fixture contains no food-safety or legal advice.

Reference item	Recorded value
Regular loaf price	0.90 JOD
Unit production cost	0.58 JOD
Evening markdown	20% after 19:00
Markdown loaf price	0.72 JOD
Unsold loaves at 19:00	30
Loaves baked that day	240

Rules and interpretation

The markdown applies only to bread baked that day and does not stack with coupons. Expired goods are never included. Saleable unsold bread may be donated after closing only after supervisor inspection and according to the store's fictional donation procedure. Staff record sales, donations and disposal separately; donation is not counted as revenue.

Worked example / decision note

If all 30 loaves sell at the markdown price, revenue is 21.60 JOD and their production cost is 17.40 JOD, giving 4.20 JOD gross profit. The 30 unsold loaves represented 12.5% of the day's production at the 19:00 observation, not final daily waste.
