Weekly sales and product contribution

Amber Corner

Amber Corner is a fictional Amman neighborhood supermarket. The table covers three products for 8-14 October 2026 only. Revenue excludes delivery fees; COGS means cost of goods sold. This is not the store's entire revenue or net profit.

Reference item	Recorded value
Product	Units / revenue / COGS
Bread 600 g	200 / 180.00 / 120.00 JOD
Milk 1 L	150 / 195.00 / 142.50 JOD
Rice 5 kg	40 / 240.00 / 184.00 JOD
Three-product total	390 / 615.00 / 446.50 JOD
Gross profit	168.50 JOD

Rules and interpretation

Gross profit is revenue minus COGS, before rent, wages, utilities, taxes and other operating costs. The three-product gross margin is 27.40% of revenue, rounded to two decimals. Bread led unit sales, while rice led revenue. No refund, tax or operating-expense figures are provided.

Worked example / decision note

Average daily milk volume was approximately 21.43 cartons across the seven-day period. Rice generated 56.00 JOD gross profit, bread 60.00 JOD and milk 52.50 JOD. Do not label the 168.50 JOD figure as monthly net profit.

Scope: synthetic test reference only. This document does not create KEEL transactions, change live stock, or establish facts about a real business.
