Detergent inventory and replenishment

Copper Shelf

Copper Shelf is a fictional Irbid supermarket monitoring laundry detergent, SKU DET-42. This opening inventory snapshot is dated 15 October 2026. The supplier is Blue Harbor Distribution. All quantities are retail 2 kg packs.

Reference item	Recorded value
On-hand stock	18 packs
Reorder point	25 packs
Open purchase order	40 packs
Expected inbound date	18 October 2026
Recent average daily demand	6 packs
Supplier lead time	5 calendar days

Rules and interpretation

At the recent demand rate, on-hand stock represents three days of cover. Inventory position is 58 packs when the confirmed open order is included; no backorders are recorded. Staff should investigate the near-term stockout risk rather than blindly placing another order simply because on-hand stock is below the reorder point.

Worked example / decision note

A new duplicate 40-pack order is not approved automatically. The buyer must first confirm that the inbound truck will arrive on 18 October. If the supplier reports a delay, the shift manager may authorize a transfer from another store. The historical demand rate is not a generated forecast.
